

## ACAMPROSATE (Campral) Side Effects:

Most common: diarrhea (dose-related, transient), weakness, swelling of the arms and legs, insomnia, anxiety.

Serious but rare: Acute renal failure reported in a few cases; suicidal ideation, attempts, and completions rare but greater than with placebo in studies.

Pregnancy: Category C. There are no controlled data in human pregnancy. Birth defects and still-born fetuses in animal studies.

This is a simplified list of side effects focusing on what is common or severe because complete lists of more rare and less serious side effects are often overwhelming. If desired, complete lists of potential side effects can be found on reputable web sites like [Drugs.com](http://Drugs.com).
