

BUPROPION (Wellbutrin) Side Effects

Most common: agitation, insomnia, headache, nausea, vomiting, tremor, rapid heart rate (tachycardia), dry mouth, weight loss.

Serious but rare: seizures; risk higher with rapid and large dose increases and in patients at risk for seizures.

Pregnancy: No increased risk of birth defect shown thus far.

This is a simplified list of side effects focusing on what is common or severe because complete lists of more rare and less serious side effects are often overwhelming. If desired, complete lists of potential side effects can be found on reputable web sites like Drugs.com.
