

RAMELTEON (Rozerem) Side Effects:

Most common: headache, sleepiness, fatigue, dizziness, nausea.

Serious but rare: severe allergy, angioedema (swelling due to allergy), complex sleep-related behavior (sleep-driving, cooking or eating food, making phone calls), increased prolactin (hormone that stimulates milk production), abnormal cortisol (stress hormone) or testosterone levels.

Pregnancy: few data.

This is a simplified list of side effects focusing on what is common or severe because complete lists of more rare and less serious side effects are often overwhelming. If desired, complete lists of potential side effects can be found on reputable web sites like Drugs.com.
